A horizontal row of 20 empty square boxes, each outlined in blue, intended for children to draw or write in.

Figure 1. A schematic diagram of the experimental setup for the measurement of the absorption coefficient.

A horizontal row of 40 small, empty rectangular boxes. Each box has a thin blue border and is designed to look like a piece of lined paper. They are intended for students to write their answers in.

A horizontal row of 20 empty rectangular boxes, each with a thin black border, intended for handwritten responses.
