The image displays two different types of relays. On the left is a black automotive relay with a rectangular body and several metal terminals. It features a label with the text 'Forward', 'Switch', and '500V'. On the right is a blue industrial relay with a more complex, multi-terminal design. It has a label that reads '8-80.3', '10A', '250V', and 'CE'. Both relays are shown against a plain white background.
