The image displays two different types of relays. On the left is a black, rectangular automotive relay with a sliding switch mechanism. It features a black plastic housing with a silver-colored metal base. The top of the housing has a sliding switch with a black knob. The side of the housing is labeled with 'Forward', 'Stop', and 'Back' in white text, along with a small white triangle pointing upwards. On the right is a blue, rectangular industrial relay. It has a blue plastic housing with a silver-colored metal base. The top of the housing has a sliding switch with a black knob. The side of the housing is labeled with 'Forward', 'Stop', and 'Back' in white text, along with a small white triangle pointing upwards. The bottom of the housing has a label with '12VDC' and '10A' in white text, along with a small white triangle pointing upwards.
